

GLASS STORAGE

Whether your need storage for crates or glass sheets, we are able to provide specialised racks for every purpose.

Frame racks enable large volumes of glass to be stored as a result of the clever interlocking stacking system and can be further enhanced by remote control and motorisation.

Simple drawer racks enable you to choose exactly what you need from one or two sides.

Quick to access and simple to operate, Hakon storage racks will save you time and effort, making your job that much easier.

Storing glass should always be done in a safe and space-efficient manner. Our partner, Hakon, from Czech Republic, has specialised in industrial glass storage and sorting since 1992.

Manual Frame Racks
