

ECOWHEELS

There are two important features to consider with polishing wheels: edging speed and polishing quality, both of which are closely connected. Flat Glass Solutions and Luca Moreshi offer an Italian made polishing wheel - EcoWonderWheel.

The construction of our grinding wheel is different from other traditional abrasive wheels. Our wheel is much more homogeneous and allows the wheel to wear gradually and evenly in its consumption. EcoWonderWheel is constructed with great accuracy and with a selection of recycled raw materials, which gives us a brighter finish with less lines and in less time.

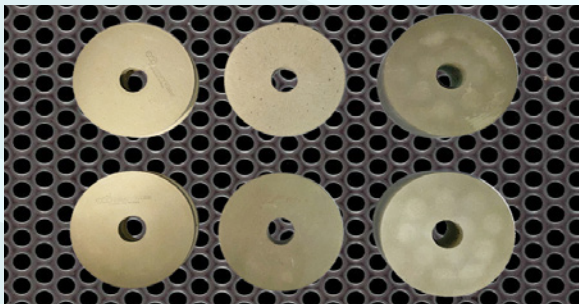

They are suitable for all types of glass processing from industrial to commercial white goods for the most demanding clients. EcoWonderWheels produces a brighter glass edge with a smoother finish enabling it to reflect the light in the best possible way.

Peripheral Wheels

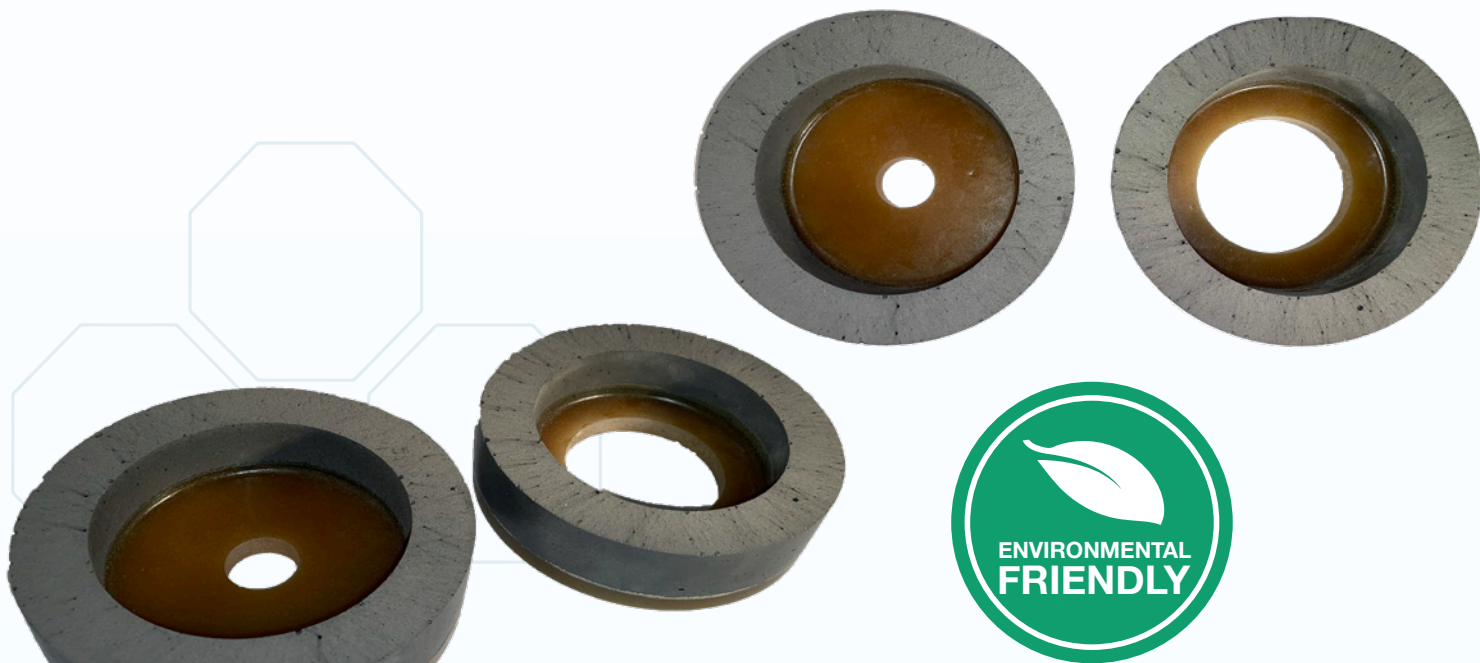

- Diameter: 100 - 150 - 200 mm
- Thickness: 10 - 15 - 20 - 25 - 30 - 40 - 50 mm
- Bore: 22 - 90 mm
- Grain: 40 - 60 - 80 - 120 - 400

TECHNICAL FEATURES

ECO PERIPHERAL

- Wheel Life up to 2300 linear meters
- Polishing Quality is a higher gloss
- Speed - 1500 rpm
- Feed Rate - 3m per minute
- Removal - 0mm

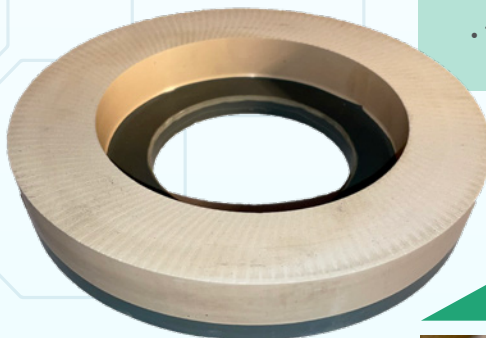

Eco Polishing Wheel reduces the problems with polishing glass. With EcoWonderWheels you are not just buying a product but:

1. The solution to your polishing problems.
2. Clear advice on all steps prior to polishing.
3. Technical advice specific to the wheel and the product.
4. Service advice and support.

Made from
Recycled Materials

Cup Wheels

- Diameter: 125 - 130 - 150 - 175 mm
- Depth: 30 - 35 - 40 - 50 - 60 mm
- Bore: 10 - 90 mm
- Grain: 40 - 60 - 80 - 120
- TS Equivalent 9R / 9RS
- TM Equivalent 10S

TECHNICAL FEATURES

ECO CUP

- Wheel Life up to 1500 linear meters
- Polishing Quality is a higher gloss
- Speed - 1500 rpm
- Feed Rate - 3m per minute
- Removal - 0mm
